## A FAMILY OF WATER SOFTENERS FOR THE DISCRIMINATING HOMEOWNER

The all-new new **Fusion<sup>2</sup> 360** collection of twin tank water softeners embodies the latest in water softening technology, combining high efficiency and rugged reliability. Each system is manufactured from corrosion-free composite materials, ensuring years of reliable, trouble-free service. Quality components include a brine safety valve, NSF-certified *Excelclear* ion exchange resin and a heavy duty brine tank.

The **Fusion<sup>2</sup> 360** electronic meter-initiated control valve features a service flow rate to 27 GPM, to meet any household demand. It has up or down-flow brining and 40 pre-set programs to choose from, to perfectly suit all likely raw water conditions.

All **Fusion<sup>2</sup> 360** twin tank softeners feature a **Midnight Black** brine tank and mineral tank jacket with matching **Platinum Ice** trim.

<b>Fusion<sup>2</sup> 360</b> Twin Tank Model	Tank Size (ft <sup>2</sup> Resin)	Capacity (Grains)
F2360/20	0.7	20,000
F2360/30	1	30,000
F2360/40	1.3	40,000
F2360/50	1.7	50,000
F2360/60	2	60,000
F2360/75	2.5	75,000
F2360/90	3	90,000
F2360/120	4	120,000

### Standard System Features

## EXPERIENCE THE LUXURY OF PURIFIED WATER DELIVERED TO YOUR OWN SINK

The **Fusion<sup>2</sup> 360** residential reverse osmosis drinking water system represents the state of the art. The entire unit, including the RO water storage tank, is enclosed in the F360's cabinet making the installation compact and secure. With a daily capacity of 285 liters (75G) the Fusion<sup>2</sup> 360 RO system easily meets the needs of a bustling household. Simple to operate and maintain, each system is equipped with a quality polished faucet (custom finishes are available from your dealer) and all the necessary accessories for easy installation. A booster pump model is available for more demanding applications.

*Fusion<sup>2</sup> 360 Compact Cabinet RO systems provide easy access for cartridge changes and maintenance*

Both models feature a built in **Leak Stop** interrupter, to protect your home from unintended leakage. Drinking water TDS may be easily checked by a push-button electronic monitor conveniently located on the front panel. Each of the **Fusion<sup>2</sup> 360** RO cabinets comes in stunning **Platinum Ice** trimmed in **Midnight Black**.

### **Fusion<sup>2</sup> 360** RO Standard Features

- ✓ 75GPD **BLACK MAX** RO membrane
- ✓ **Leak Stop** flow interrupter
- ✓ Push-on connections throughout
- ✓ Rugged cabinet In **Platinum Ice**
- ✓ Push-button electronic TDS monitor
- ✓ Quality installation components

## ELEGANCE AND PERFORMANCE: PREMIUM BRINE CABINETS

Brine cabinet softeners provide owners with a compact footprint and a sleek, sculptured appearance, with the premium benefits of the **Fusion<sup>2</sup> 360** advanced electronic valve. Push- button programming convenience and a easy-to-read LED screen make installation a breeze. Moulded in **Platinum Ice** and trimmed in **Midnight Black**, the heavy duty cabinet features a sturdy hinged lid for easy salt loading access and a brine safety valve.

<b>Fusion<sup>2</sup> 360</b> Cabinet Model	Tank Size (ft <sup>2</sup> Resin)	Capacity (Grains)
F2360/20C	0.7	20,000
F2360/30C	1	30,000
